CIGRE Australia Power Electronics and Power System Integration Seminar

Pullman Sydney Hyde Park | 29-30 October 2024

CIGRE Australia is conducting its first seminar exploring the issues and challenges associated with the high penetration of power electronic interfaced devices on the power system. This seminar is an industry-wide discussion on existing and emerging challenges associated with the technical aspects of power system performance, modelling, analysis, protection and control, and operation in a changing power system environment, and with the evolution of power electronic devices.

In addition to our presentations from industry and academia, the seminar is proposing a high level of delegate interaction through facilitated discussions. Over the two days you will enjoy keynote addresses, presentations, discussion sessions, a networking function and concluding with a panel session.

Program Outline

Day 1 - 29 October 2024

Keynote Presentations

Mr Bernard Norton, Country Managing Director,
Hitachi Energy Australia

Ms Merryn York, Executive General Manager -
System Design, AEMO
